

Domestic to Commercial Change Over

Why SETA UK?

John and the team are passionate about both training and our business, we pride ourselves on offering **REAL TRAINING and ASSESSMENT** processes. We will push you hard and there will be lots of home work, but we are both fair and friendly in our approach. Seta UK is a family run training centre with 8 of the staff being part of John's family, all of our trainers and assessors work full time for Seta UK so are dedicated to delivering exactly what is needed, giving the best training possible.

We have been open since July 2015 and have grown from strength to strength, so much so that in November 2017 we took on another adjoining building enabling us to extend the training and assessment areas, allowing us to bring in new courses and improving the ones we already run, with some extra space to grow for the future....

We feed you every day that you are in centre with plenty of tea, coffee and biscuits on tap.

We will also support once you have finished and stay in contact as everybody becomes a friend of the centre

Why not have a look and indeed like our facebook page to see what the candidates have to say about us?
[southernenergytrainingacademy](https://www.facebook.com/southernenergytrainingacademy)

I personally promise that we will do our very best for anybody that books a course with SETA UK

Many thanks

John

Registered Office : Unit J Buttericks Building, 38 New Lane, Havant PO9 2ND

Directors : Mr John Razzell & Miss Sophia Razzell

Company Registered in England & Wales, Co Reg No. 09589645 Vat No. 220 7959 05

Who is it for?

Operatives must hold a valid CCN1 qualification and are looking to expand into the commercial heating sector.

Course Material

We provide everything you need for the course, including the most up to date training manual!

What's involved?

The course involves 6 days in centre training on both theory and practical elements on:

- Clean Air Act
- Commercial chimney system requirements
- Installation requirements of commercial gas Pipework above 35mm
- Strength testing, tightness testing and purging of commercial gas pipework up to 6" diameter or 1m³ in volume
- Commercial pipework and appliance controls
- Combustion analysis of commercial appliances including NO_x and SO_x
- Operation of force draft burners
- Ventilation requirements of commercial appliances
- Commission, service, repair and breakdown of overhead radiant plaque heaters and radiant tube heaters

Assessments

The assessments are undertaken in centre over two days with a mix of practical tasks and multiple choice written papers on:

- CODNCO1 – Changeover Domestic to Commercial
- ICPN1 – Installation first fix on commercial pipework
- TPC1a – Tightness testing and direct purging of pipework not exceeding 1m³ in volume or 6" in diameter
- CDGA1 – Direct fired commercial appliances
- CIGA1 – Indirect fired commercial appliances
- Cort1 – Overhead radiant plaque & radiant tube heaters

What happens once the assessments are complete?

Once your training and assessments are successfully completed, our Internal Quality Assurance Team will check through and sign off your portfolio and from here your portfolio will be forwarded to Logic Certification Ltd for verification and certification. Once certification has been issued, Logic Certification will automatically notify the Gas Safe Register. This process normally takes 3 to 5 weeks, however, a Fast Track Service is available which reduces the time to approximately 7 to 10 days (this is chargeable if required).

Course Duration

8 days normally, Monday to Thursday, 0830 start – 1630, finish for 2 consecutive weeks.

Course Price

The course is priced at £1500 + VAT and this includes all registrations, training, training manuals, assessments, certification fees and lunch each day in centre.

Please note: On all bookings, we require a 50% deposit with the balance due 2 weeks prior to the course start date.
